## **DETAILED ACTION**

### **Reasons For Allowance**

1. The following is an examiner's statement of reasons for allowance: Applicant's invention relates to web browsing histories and their optional storage as bookmarks. More specifically, each web page visited by the user is rendered as a thumbnail image. The invention then compares the current web page content to content of a previously accessed web page. If the page content is different between the two pages, then the thumbnail of the currently viewed web page is displayed in an area on the screen (e.g., browser window, frame).
2. This specific limitation of the independent claims describing the comparison of content between a currently viewed web page and a previously viewed web page and only displaying thumbnails of visited web pages that are unique is not described by the prior art of record. For example, the prior art of Ayers discloses "The browser makes no attempt to determine if two different URLs reference the same document, so sometimes the same document can appear more than once in the Graphic History View".
3. An additional limitation where the user then has the option to review those thumbnails displayed by virtue of their corresponding web page "uniqueness" and select those that the user desires to make into bookmarks (bookmarks typically remain stored from one session to another).
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
